Blockchain Centre of Excellence (CoE) Established with Augusta Hitech

AUGUSTA
better future. together.

About the Company

Augusta Hitech is a technology-focused company delivering innovative and customized digital solutions. The organization emphasizes precision, performance, and efficiency in all its services. With expertise in advanced technologies, it provides high-quality, scalable solutions for modern industries. Augusta Hitech stands apart through its commitment to tailored, reliable, and cutting-edge technology delivery.

Objective of COE:

The primary objective of the Centre of Excellence (CoE) in Blockchain is to function as a hub for innovation, research, development, training, and policy support, enabling students to gain advanced knowledge and industry-ready skills in this emerging technology.

Here's a detailed breakdown of its objectives.

Skill Development and Training:

Conduct workshops, seminars, and certification programs to train professionals and students in block chain technologies.

Collaboration and Partnerships:

Facilitate collaboration between academia, government, and industries to drive innovation and real-world use cases.

Research and Development (R&D):

Explore and develop new block chain protocols, frameworks, and applications tailored to specific industries.
