

**K.S.R. COLLEGE OF ENGINEERING
DEPARTMENT OF MANAGEMENT STUDIES
INDUSTRIAL VISIT**

Students can observe the entire rice production process, from planting and harvesting to milling and packaging. This helps them understand how rice is grown, processed, and turned into the final product we consume. They witness how technology is integrated into farming, such as automated machinery, GPS-guided tractors, and drones for monitoring crops. Our students visited at Chennai Rice Industry which is located in Nasiyanoor, Erode on 13th September 2024.
