IOT CLUB ACTIVITY

The future is here, welcome in a world where everyone and everywhere is connected to the internet. We are using THE INTERNET OF THINGS already in our everyday life with smart phones, tablets, computers and tv's connected to the internet. These devices are designed for the use of internet. But what if we hook up ordinary things to the internet and see what kind of advantages these things could bring? The internet is now being used by people, if it starts using things our life could be made easier. The Internet of Things Club is a place where you can find the latest information around The Internet of Things. From news, ideas where the IOT can take us, to examples from everyday applications. We are like the Internet Of Things, a Club open to everyone and everything.

OBJECTIVES

➢ The club will be mainly focusing on mastering the skills in students by having various hands-on sessions and some projects.

➢ Make students skilful in the devices Arduino, Raspberry Pi, Automation sensors, Actuators etc.

➢ Hands on workshops in the institute for skill development and experience.

➢ Guest Talks by professors and experts from our institute as well as other organizations on specific topics of interest.

➢ Participate in technical events conducted by various colleges and represent our college through this club.
